

Admission requirements for Bachelor and Master theses

Students who are interested in writing a Bachelor thesis or a Master thesis at our chair have to meet the following requirements:

Bachelor thesis

- Lecture “Statistics” (assessment year)
- Lecture “Introductory Econometrics”
- Lecture “Introduction to Scientific Working”
- Lecture “Business Administration III”
- Seminar “Negotiations and Conflict Resolution: Theory and Role Playing” and/or selected empirical Seminars in our topics

We thus expect our Bachelor students to have excellent theoretical knowledge in statistics and econometrics and preferably some experience with common software packages for data analysis such as Stata.

Master thesis

- Lecture “ME 1: Personnel Economics“
- Lecture “Empirical Methods“ and/or “Applied Empirical Methods for Business Administration”
- Experience and documented interest (selected empirical Seminars) in our topics
- Proficiency in Stata

We thus expect our Master students to have excellent theoretical knowledge in statistics and econometrics. Additionally, knowledge of the data analysis software Stata is mandatory.
